

Self-Rising BILL VALIDATOR

MODEL PSC-366

P O W E R

For over two years, **Reldom** has worked on casino requests for help in minimizing Workers Compensation claims. Now Reldom's PSC-366 is

THE ANSWER

For sore backs and workers comp claims.

OPTIONS

- Self-powered drive unit
- Hinged doors
- Sliding doors
- Roll-up door

With a touch of a single button, the entire shelving cage of the PSC-366 rises 15 inches, leaving the bottom shelf a comfortable 28 inches from the ground. This enables personnel to exchange the bill validators from the slot machines to the cart without the need to bend or stoop. When the bottom shelf has been exchanged, touch the button again, lower the cage nine inches to the next shelf, and continue the exchange. When the second shelf is filled, lower the shelving cage and go on with the drop in a normal mode. At *no* time is there a need to bend or pick up anything from an awkward position.

The entire electronic system is fully enclosed and has its own built-in recharging system that works from any 110 volt outlet.
